

You Can Buy This *Windy City Rehab* House for \$1.45 Million

Five bedrooms, a chef's kitchen and two decks? I'll take it.

Ever dreamed of living inside of one of the amazing Chicago homes featured on HGTV's *Windy City Rehab*? The show's star [Alison Victoria](#) just revealed [on Instagram](#) that the just-completed Bucktown project is officially on the market for \$1.45 million.

Tour This Alison Victoria-Designed House

Victoria and her contractor co-star Donovan Eckhardt, of [Greymark Development](#)

Group, originally purchased the property in 2017. After tearing down the face of the run-down, three-bedroom structure (you can see what it looked like [here](#)), they built a new whitewashed-brick façade featuring a pair of custom-built double doors.

"The inspiration all started with the vintage casing around those front doors, which, on a smaller house like this, makes it feel more grand," says Victoria. "I wanted the house to look like it had been there forever, but in a totally different style than before."

MORE FROM HOUSE BEAUTIFUL

An addition brought the house to 3,600 square feet, including five bedrooms and three-and-a-half baths. The three-story house features plenty of high-end touches, among them wide-plank French oak floors, a one-of-a-kind kitchen with a custom-designed range hood, two first-floor fireplaces with hand-carved surrounds, an 8-foot-wide double steam shower in the master bathroom, plus a roof deck and another deck over the garage.

"It's a real mix of vintage and modern, but we kept it all very clean-lined," Victoria says of the interior. Unfortunately, the furnishings aren't included in the asking price; I'm personally quite partial to those green living room chairs.
